FRIO Wallet

**The Frio® wallet is available from Anaphylaxis Australia Inc.
It is an innovative way to keep your adrenaline autoinjector i.e. EpiPen® or Anapen® cool when the temperature is on the rise.**

Originally designed to carry insulin, **The FRÍO® wallet** can also be used for other medications, Enbrel (powder form), glaucoma eye drops, Growth Hormone, etc

Description:

- Keep your adrenaline autoinjector cool and safe
- Activated by cold water only
- No refrigeration or ice needed
- Light and compact
- Reusable

Suitable for carrying one adrenaline autoinjector kept in its storage tube:

Your adrenaline autoinjector should never be placed directly in the fridge or on an ice pack.
Note: EpiPen® must be kept in the storage container provided by the manufacturer and then inserted into the Frio®.

REALLY EFFECTIVE:

Tests show **FRÍO® wallets** keep insulin safe for a minimum of 45 hours (lasts up to 5 times longer than an ice pack) - even in constant environmental temperatures of 37.778 degrees Celsius /100 degrees Fahrenheit! Keep one at home and make **FRÍO®** cooling packs part of your travel kit today - no more bulky, inconvenient ice packs. You'll wonder what you ever did without one. The photo below is showing insulin pens and not an adrenaline autoinjector.

One adrenaline autoinjector in its storage tube fits in the wallet.

External dimensions: 83mm x 180mm

Weight*: 32g * FRIO® wallet along with a plastic bag and instruction leaflet
Please turn over for further information.

SO EASY TO USE:

The principle is simple. To activate the wallet, immerse it in cold water for 5-7 minutes. Crystals contained in the panels of the wallet then expand into a gel, which remains cool for several days - relying on the process of evaporation for cooling. Then just towel dry the outside and it's ready to go!

SPECIAL FEATURES:

Although activated by water, a feature of the product is that after towel-drying, the **FRÍO® wallet** is dry to the touch. The Cambrelle™ pouch which is included when you purchase the **FRÍO® wallet** increases the wallet's efficiency and allows it to be carried safely in your pocket or a bag as required. Each item is re-usable and can be used either continuously or intermittently.

The **FRÍO® wallet** and the crystals have been scrutinised by the FDA and their sale in the USA has been approved. Also, the **FRÍO® wallet** has been extensively tested by the British Medical Devices Evaluation Unit. The crystals contained in the **FRÍO® wallet** conform to the relevant British Safety Standards.
